VOLUNTEER SPOTLIGHT

Robert Langlois

YOUR DAY JOB

I'm a Principal Associate and the Director of Project Risk with J.L. Richards & Associates Limited, reporting to our Sudbury Office.

WORK WITH ACEC-ONTARIO

I'm currently the Chair of the Sudbury Chapter of ACEC-ON and have been in this role for a little over one year.

ADVICE TO NEW VOLUNTEERS

Any opportunity to network and share knowledge is beneficial. However, participation in this organization is geared towards the business side of the engineering profession, so I'd encourage a new volunteer to look to benefit from that exposure.

EXPERIENCE GAINED

Through our regular meetings of the new chapter in Sudbury, I am in regular contact with many of the other engineering consultants in this City. This is a forum for networking and knowledge sharing that didn't formally exist previously, and I'm very grateful to be part of it. I've gained some stronger professional relationships with other firms in this area.

WHAT BROUGHT YOU TO VOLUNTEER?

Earlier in my career I volunteered with PEO and found the experience fulfilling. I was looking for something a little different to put my energy to, and given my involvement in the leadership of a multi-disciplinary consulting firm, ACEC-ON fit the bill. Not only do their initiatives and services apply immensely to our business, their presence in Sudbury and Northern Ontario needed some support from those of us who practice in this region.

FAVOURITE TRAVEL

I'm generally a fan of the outdoors - if I'm traveling on my boat, bike, skis, ATV or snowmobile, I'd love to travel there!

WORK/LIFE BALACE

Fresh air and exercise are critical to clear the mind - take a walk with the dog, listen to a podcast about something unrelated to work.

FUN FACT

I was at the infamous Woodstock '99 concert/festival in Rome, New York recently depicted in a Netflix documentary (we left before the Chili Peppers went on and the fires started...).
